INTERNSHIP

Springer Capital

December 2025

Backend Development Intern

Remote

- Built ETL microservice to extract HubSpot CRM Deals data
- Integrated HubSpot API v3 using private app access tokens
- Designed REST APIs, PostgreSQL schema, and Dockerized services

PROJECTS

Crop Yield Predictor | Python, Scikit-learn, Machine Learning

- Developed ML model to predict crop yield based on agricultural parameters
- Performed data preprocessing, feature selection, and model training using Scikit-learn
- Evaluated model performance using accuracy metrics and confusion matrix
- Built simple interface for users to test predictions

Car Rental Website (Full Stack) | React, Node.js, Express, MongoDB, MySQL

- Designed and developed full-stack car rental platform with booking system
- Implemented user authentication, car listing, and admin management features
- Built responsive frontend using React with HTML, CSS, JavaScript
- Used MongoDB/MySQL for storing user and booking data

Connect Aggro (Agri-Tech Platform) | Web Development, REST APIs

- Developed agri-tech platform connecting farmers directly with buyers
- Enabled product listing, inquiry, and communication features
- Designed backend APIs for data handling and user management
- Focused on improving transparency and reducing middlemen in agriculture

Personal Portfolio Website | HTML, CSS, JavaScript, Web Development

- Created personal portfolio to showcase projects, skills, and contact information
- Designed clean and responsive UI for desktop and mobile devices
- Implemented sections for About, Projects, Skills, and Contact
- Deployed website for public access

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL, JavaScript

Web Technologies: HTML, CSS, React, Node.js, Flask, REST APIs

Databases: MySQL, MongoDB, PostgreSQL

Tools: Git, GitHub, Docker, VS Code

ML/AI: NumPy, Pandas, Scikit-learn

SOFT SKILLS

Communication: Effective verbal and written communication, technical documentation

Problem-Solving: Analytical thinking, troubleshooting, solution-oriented approach

Teamwork: Collaboration, adaptability, constructive feedback

Time Management: Project planning, deadline adherence, prioritization

CERTIFICATIONS

- Introduction to Building with AWS Databases — AWS
- Python Basics — SQL Fundamentals — Git & GitHub
- Data Structures & Algorithms
